What's Special About Our **BARAKA SINUS REJUVENATION OIL?**

For two years, we worked with one of the top aromatherapy experts in the country to formulate this blend of organic essential oils for the sinuses. Not only does it fight infection and drain mucous, but it has the potential to rejuvenate the sinus cavities. Dozens and dozens of people have called to report they've broken their cycle with antibiotics! This is exciting news! Below is some basic information on essential oils.

1. While everyone claims to know what essential oils are, few know what they do (besides smell good). When inhaled, essential oils occupy key receptor sites along the sinus passages blocking out micro-organisms and allergens. In fact, 80% of all essential oils have anti-microbial functions which knock out infections and if used over a long period of time have the potential to create long-term changes. Great for chronic sinus sufferers.

2. For optimal results, this oil is applied topically 3-4 times a day at the base of the nostrils. Repeated applications expose the sinus passages to their rejuvenating powers. While these oils have mild decongestant properties, they won't change the condition of someone's sinuses overnight. People have to be patient. This is a 2 month commitment, but for most long-term sufferers that is nothing compared to years of discomfort.
3. While we could have created a blend that was diluted and half the price, it just wasn't powerful enough. This blend includes the organic essential oils of green myrtle, inula graveolens, rosemary verbenone, eucalyptus dives, spike lavender, peppermint. All the oils are bought from small farms and coops around the world. There is no carrier oil.
4. Each 5 ml. bottle has over 400 applications or 2-3 months supply! Definitely worth the price! We're so confident of the results you'll get we offer a money-back guarantee.
5. For more information on the medicinal uses of essential oils, please visit the website of our blenders at the Pacific Institute of Aromatherapy.
